

Garett is a leader in the children's smartwatch market. We have been providing state-of-the-art technological solutions for a decade, giving parents peace of mind, and supporting them in caring for their children, guaranteeing kids moments of carefree fun and the ability to contact their loved ones at any time. We also produce smartwatches for adults, which will perfectly complement sports, casual or business outfits. In addition, they include 100 modes, biometric sensors, or an AOD feature display and are even indispensable during training or everyday activities.

Garett Beauty has been created so that every woman can provide herself with luxurious care at home. In a busy world, we don't always have the time or opportunity to go to a spa, and thanks to Garett Beauty, you can easily create one in your own home. Home care devices allow you to relax, but also to professionally take care of the appearance of your face, hair and body. The technologies used in them are safe and effective, which means that increasingly more satisfied users are reaching for products with the logo of the Kielce-based company.
